

SLIME WILL CAUSE

THIS TO YOUR ICE MACHINE

IceZone

BIOZONE
SCIENTIFIC INTERNATIONAL

**Chemical-free,
automatic disinfection
saves time and money
while promoting hygiene
continuously, 24/7.**

IceZone® is an air and surface clean-in-place (CIP) system for ice machines. It destroys microbes on every surface that the ice touches in the ice production area, storage bin, and beverage dispenser.

- Kills flu and other viruses**
- Prevents the formation of slime, mold, and yeast**
- Controls bacteria in hard-to-reach areas that are difficult to clean**
- Works with every type of commercial ice machine**

IceZone Benefits: By the Numbers

75%

Reduce ice machine cleaning time by up to 75%

30%

Increase expected lifespan of ice machines by up to 30%

70%

Reduce service calls relating to ice machines by up to 70%

Sample Return on Investment

Before IceZone:

cleaning cost per ice machine 5 years

\$8,750

After IceZone:

cleaning cost per ice machine 5 years

\$4,337.75
