MANAGER & CREW TO BE ON SITE AT THE CONCLUSION OF INSTALLATION FOR EQUIPMENT CLEANING & TRAINING

- All sections on this form must be confirmed and completed prior to scheduling installation.
- To help prevent delays in scheduling your installation, it is requested Franke receive this signed form at least 7 business days prior to the requested installation date/time. If this survey is not received by Franke at minimum 3 business days prior to the installation date/ time requested, scheduling delays may occur, and it's recommended to reschedule your installation to avoid potential delays and additional charges.
- After arrival, if the technician determines that site readiness differs from what was confirmed per this form or a required item is not complete, the technician will be asked to leave the site and the install will require rescheduling for a later date/time once all required items are confirmed to be complete. A newly completed form will be required prior to rescheduling installation. The Purchasing Customer or Dealer may be charged up to $650 for incomplete site readiness requirements should the installing technician need to return to complete the installation later. In the event the technician is available to wait for completion of any facility requirements or required product supply as part of the installation process, and the wait does not exceed 1 hour, then a delay fee of $150 may apply. If the wait time exceeds 1 hour, the installation will be required to be rescheduled for a later date/time and additional rescheduling charges of $650 may apply.
